

α_N^M (refine observables)

M : observation

N : UV cutoff

∞ : continuum
CFT

scale

observables
 $A, B \in \mathfrak{A}_M$

simulated lattice
 $n = 2^{N+1}$ sites, $2n$ qubits

$\mathcal{E}_M^N$ (coarse-grain states)

$r = N - M$ renormalization steps

discretization error $\lesssim C_T 2^{-sN}$
